SKILLS

Programming Language :- **Java**
JavaScript HTML CSS C# .NET

Framework : **Angular .NET**

Library : **ReactJS Redux NLTK**

Technology:- **Machine Learning Web Development**

Database: **SQL, MongoDB GIT**
Debugging Troubleshooting Linux

EDUCATION

B.E(CSE) - 7.9 CGPA

SLS University

2018 - 2022

State Board of Secondary Education

KDB School

Higher Secondary - 76% 2017

State Board of Primary Education

KDB School

Secondary - 76% 2015

CODING PROFILES

LeetCode: 400+ problems solved
GFG:100+ problems solved
Hackerrank:5star on Problem solving
and 4star on java

WORK EXPERIENCE

Assistant System Engineer

2022July-2023OCT

TCS

- Developed a high-performance web application using **React** and **Redux**, incorporating code minification, lazy loading, and optimization for Core Web Vitals to enhance speed and user experience.
- Implemented containerized web architecture and created a CI/CD pipeline, decreasing deployment time from **1 days to 2 hours**, resulting in more efficient and reliable releases.
- Developed and maintained frontend components using React and Angular, resulting in a **20% improvement in user experience**.
- Designed and implemented RESTful APIs in **Spring boot**, ensuring compliance with industry standards, enhancing frontend-backend communication, and **reducing response times by 50%**.
- Optimized database schemas, **reducing query response times by 30% and enhancing system performance**.

Tech Stack :- Java Spring boot Nodejs Java ReactJS TypeScript
Redux Kafka Docker

FullStack Developer

MAXLINK IT SOLUTIONS

2023DEC-PRESENT

- Developed a full-fledged website within a deadline, meeting all client specifications and requirements. Implemented **SEO** best practices, ensured a modern and user-friendly UI design, and optimized the website for high performance.
- Executed the seamless migration of projects in both **Angular** and **React** from old to new versions. Ensured compatibility, optimized performance, and incorporated modern technical standards.
- Transformed the entire **Spring boot** WebAPI infrastructure to Lambda API, leveraging **AWS** serverless architecture for improved scalability and cost-efficiency. Conducted comprehensive testing to validate functionality and performance.
- Resolved daily software bugs and implemented enhancements to enhance overall system stability and user experience.
- Tech Stack: React NodeJS Angular Redis Spring boot**

Projects

Ekart

[Github](#)

- Developed a backend server using expressjs which have following functionality.
- Implemented User Authentication functionality to ensure access to site's features using JWT.
- Implemented secure password and authentication using bcryptjs for user registration.
- Implemented CRUD and payment gateway functionality using mongoDB and Stripe or Razorpay.
- TechStack: ExpressJS Mongoose MongoDB JavaScript EJS SwaggerYaml**
